

E-NEWSLETTER | ISSUE 02
MAY 2016

IN THIS ISSUE:

TECLO outputs:

- E.Q.F. of the Textile & Clothing Manager
- The TECLO Label and Manifesto of cooperation
- Decalogue of benefits of Collaboration

Ongoing activities:

- MOOC's development
- Learning Laboratories for MOOC's validation

TECLO Outputs : E.Q.F of the Textile & Clothing Manager

One of the aims of the TECLO project, the **European Qualifications Framework (E.Q.F.) of the new Textile and Clothing Manager**, is ready. It is the result of a desk and field research and has been validated via workshops in all partner countries.

The E.Q.F. will contribute to wider lifelong learning goals and will increase the learning and labour mobility, employability and social integration of the work forces.

The contents of the E.Q.F. are related to transversal skills, however it includes also a learning area addressing general technical issues and the academic requirements for the TECLO manager.

It is available in eight languages: English, Spanish, Greek, French, Italian, Polish, Romanian and Slovene.

Download the E.Q.F. at: <http://teclo.eu/outputs/#EQF>

TECLO Outputs : Decalogue of Benefits

The TECLO consortium has created a **Decalogue of the benefits of innovation** promoting collaborations between the Textile and Clothing business and Higher Education Institutes/Research Centres.

The Decalogue illustrates the 10 competitive advantages of co-investing and participating in the activities of higher education institutions, research centres and business centres to address new skills requirements. It aims to help both sides overcome the obstacles and hesitations and realise the benefits of such collaborations.

It is available in eight languages: English, Spanish, Greek, French, Italian, Polish, Romanian and Slovene.

Download the Decalogue at:

TECLO Outputs : The TECLO Label and the Manifesto of Cooperation

TECLO aims at bringing together research and academia with the industry. A key action towards this task, is the Manifesto of willingness to co-operate between SMEs and HEIs from the T&C sector. The Manifesto is based on and shares the TECLO Decalogue (see previous section of this newsletter).

The TECLO consortium commits itself to assist companies by:

- Providing further information and general assistance to support the implementation of the TECLO Decalogue when requested,
- Encouraging managers to promote lifelong learning in the workplace based on the outcomes of the TECLO Project,
- Making innovative learning tools available, enabling learning anywhere and anytime.

The Manifesto has already been signed by more than 100 companies in EU and more participants from both EU and non-EU companies are invited to sign the agreement.

It is available in eight languages: English, Spanish, Greek, French, Italian, Polish, Romanian and Slovene.

You can read the Manifesto at: <http://teclo.eu/agreement/>

Ongoing activities: MOOC's development

The TECLO consortium is developing a **Massive Open Online Course (MOOC) for Future Textile and Clothing Managers**. This is one of the most important deliverables of the project and it will be a flexible ICT tool, offering contents in a very practical and job-oriented form (e-How) in order to attract students and provide experiential entrepreneurship learning. The MOOC consists of 7 learning units which will become available on the TECLO website in August 2016.

The MOOC will be available in eight languages: English, Spanish, Greek, French, Italian, Polish, Romanian and Slovene.

7 UNITS

1. Implement export oriented strategies within the T&C sector
2. Implement non-technological innovation within the T&C sector
3. Implement marketing innovation
4. Re-engineer processes according to sustainability, CSR and Quality
5. Act as a leader
6. Take risks
7. Act creatively

Ongoing activities: Learning Labs for MOOC's validation

The quality of the TECLO project and its outputs, is one of the key parameters for the success of the project. The MOOC developed in the TECLO project will be top class learning material in every aspect (design, content and method of delivery) and for this reason, it will be validated by organising **pilot Learning Labs**. The Learning Labs will take place in the eight European Countries of the TECLO consortium, with up to about 100 participants (textile and clothing students and managers and training experts) as evaluators.

The Learning Labs will take place in May 2016 and the results will be used for improvement and validation of the MOOC.
